## Summary

This dataset represents sand and gravel operations in the United States. These data were obtained from information reported voluntarily to the USGS by the aggregate producing companies. The data represent commodities covered by the Minerals Information Team (MIT) of the U.S. Geological Survey, and the operations are those considered active in 2002 with production greater than 50,000 tons, which are non-government, non-portable, and surveyed by the MIT.

## Description

This dataset represents sand and gravel operations in the United States. These data were obtained from information reported voluntarily to the USGS by the aggregate producing companies. The data represent commodities covered by the Minerals Information Team (MIT) of the U.S. Geological Survey, and the operations are those considered active in 2002 with production greater than 50,000 tons, which are non-government, non-portable, and surveyed by the MIT. These data are intended for the geographic display and analysis at the national level, and for large regional areas. The data should be displayed and analyzed at scales appropriate for 1:2,000,000-scale data. \*\*\*\* NOTE April 2017, MARIS staff extracted the MS portion of this data set for distribution \*\*\*\*

## Credits

The following USGS scientists contributed to this map layer: Jason Christopher Willett, Wallace Bolen, Matthew Brady, Susan Copeland, Cheryl Crawford, Roxanne DeLong, Cara Doud, Gabe Durand, Patricia Egger, Jennifer James, Brian Jaskula, Lucy McCartan, Nicholas Muniz, Feri Naghdi, Lloyd Southam, Robyn Tapper, and Valentin Tepordei.

## Use limitations

Access Constraint: None (Public Domain Information) Use Constraint: None (Public Use) Use Limitations: No warranty expressed or implied is made by the U.S. Geological Survey regarding the utility of the data on any other system, nor shall the act of distribution constitute any such warranty. No responsibility is assumed by the U.S. Geological Survey in the use of these data.
