Summary

MS TIGER Counties 2020 with Population Density

Description

MS TIGER Counties 2020 with Population Density - This layer was created by MARIS staff November 2021. We added the ALAND20 and AWATER20 values to get total area of the polygon in square meters. Then divided this by 2589988.1103 to convert to square miles (formula from ANSII). Then we divided the attribute P0010001 (total population) by the newly calculated number of square miles to get population density.
