Shapefile

Tags

colleges, universities, community colleges, nursing, health, location

Summary

Locations of the Nursing programs at Mississippi's public universities, private universities, and colleges, and community / junior colleges.

Description

Provide locations of the Nursing programs at Mississippi's public universities, private universities, and colleges, and community / junior colleges and their off-site campuses. This data was compiled from the MS Public Universities' Director of Nursing Studies. MARIS staff used the IHL shapefile and private colleges shapefile for locational information.

Attributes concerning programs was provided by the MS Public Universities' Director of Nursing Education. mtemple@mississippi.edu

Credits

MS Public Universities, MS Community College Board, MS Private Colleges/Universities, MARIS

Use limitations

Data users are encouraged to read this metadata record to better comprehend and utilize the described data set. MARIS should be recognized as a source data provider on all data derived from this data set. The data are not survey products and not intended for legal use.

DESCRIPTION

ABSTRACT

Provide locations of the Nursing programs at Mississippi's public universities, private universities, and colleges, and community / junior colleges and their off-site campuses. This data was compiled from the MS Public Universities' Director of Nursing Studies. MARIS staff used the IHL shapefile and private colleges shapefile for locational information. Attributes concerning programs was provided by the MS Public Universities' Director of Nursing Education. mtemple@mississippi.edu

PURPOSE

Locations of the Nursing programs at Mississippi's public universities, private universities, and colleges, and community / junior colleges.

ATTRIBUTE ACCURACY

ATTRIBUTE ACCURACY REPORT

Attribute values were validated via cross-checks with existing data resources including photographs, maps, imagery, and scientific reports.

LOGICAL CONSISTENCY REPORT

All line work is checked for topological integrity and to ensure that polygons are fully enclosed, no duplicate lines or points exists, line segments are composed of sequentially numbered coordinate pairs, intersecting lines are separated by a node, and no dangling lines exist. Topological checks and structuring are performed using the ArcInfo software. Data dictionary specification are automatically implemented via the ESRI Info database management software. Data collected from external data providers are randomly verified.

COMPLETENESS REPORT

The data are complete with respect to the data publication date and scale.

POSITIONAL ACCURACY

HORIZONTAL POSITIONAL ACCURACY

HORIZONTAL POSITIONAL ACCURACY REPORT

Feature locations were validated via cross-checks with existing data resources including photographs, maps, imagery, and scientific reports.

SOURCE CONTRIBUTION
A chart of all locations of sites was provided by the Office of Policy Planning and Research

PROCESS STEP
PROCESS DESCRIPTION
A list of university, community colleges, and off site campuses was provided by IHL staff. The individual locations were identified using a combination of address matching using the MS One Call Data and then fine tune locating using the 2007 1 meter NAIP. Attributes were populated using data provided from the IHL Office of Policy Research and Planning
