Summary

This feature class/shapefile captures Public Schools defined by the Common Core Data (CCD) for the Homeland Infrastructure Foundation-Level Data (HIFLD) database. (<https://gii.dhs.gov/HIFLD>)

*** In April 2024, MARIS staff extracted the Mississippi portion of this dataset. They then projected the shapefile into MSTM projection. ****

Description

This Public Schools feature dataset is composed of all Public elementary and secondary education facilities in the United States as defined by the Common Core of Data (CCD, <https://nces.ed.gov/ccd/>), National Center for Education Statistics (NCES, <https://nces.ed.gov>), US Department of Education for the 2019-2020 school year. This includes all Kindergarten through 12th grade schools as tracked by the Common Core of Data. Included in this dataset are military schools in US territories and referenced in the city field with an APO or FPO address. DOD schools represented in the NCES data that are outside of the United States or US territories have been omitted. This feature class contains all MEDS/MEDS+ as approved by NGA. Complete field and attribute information is available in the "Entities and Attributes" metadata section. Geographical coverage is depicted in the thumbnail above and detailed in the Place Keyword section of the metadata. This release includes the addition of 3917 new records, modifications to the spatial location and/or attribution of 97,771 records, and removal of 4563 records not present in the NCES CCD data.

DEFINITION

Attribute fields were populated using sources identified in the SOURCE field for the period covered in the Time Period metadata and other open source data. For string and date data types, NOT AVAILABLE values denote missing data that was not present in the source data. For numeric data types, -999 denote missing data that was not present in the source data. However, the missing data may be present in other sources not yet discovered and used in the creation and/or maintenance of this dataset. These records may be populated with valid information in future update cycles. For fields

sourced to NCES CCD, 'M' indicates that a value for that record is 'missing' (A value was expected and none was reported) and 'N' indicates that the data is 'Not applicable'. For numeric fields sourced to NCES, -1 indicates missing, not available, or not reported data items and -2 indicates 'not applicable' data items.

OVERVIEW DESCRIPTION ►

ENTITY AND ATTRIBUTE OVERVIEW

The entity and attribute information provided here describes the tabular data associated with the data set. Please review the detailed descriptions that are provided (the individual attribute descriptions) for information on the values that appear as fields/table entries of the data set. Please see the "Processing Steps" section for further methodology. For string and date data types, NOT AVAILABLE values denote missing data that was not present in the source data. For numeric data types, -999 denotes missing data that was not present in the source data. However, the missing data may be present in other sources not yet discovered and used in the creation and/or maintenance of this dataset. These records may be populated with valid information in future update cycles. For fields sourced to NCES CCD, 'M' indicates that a value for that record is 'missing' (A value was expected and none was reported) and 'N' indicates that the data is 'Not applicable'. For numeric fields sourced to NCES, -1 indicates missing, not available, or not reported data items and -2 indicates 'not applicable' data items.

GEOSPATIAL DATA PRESENTATION FORM GIS Data Project/Collection

DESCRIPTION

ABSTRACT

This Public Schools feature dataset is composed of all Public elementary and secondary education facilities in the United States as defined by the Common Core of Data (CCD, <https://nces.ed.gov/ccd/>), National Center for Education Statistics (NCES, <https://nces.ed.gov>), US Department of Education for the 2019-2020 school year. This includes all Kindergarten through 12th grade schools as tracked by the Common Core of Data. Included in this dataset are military schools in US territories and referenced in the city field with an APO or FPO address. DOD schools represented in the NCES data that are outside of the United States or US territories have been omitted. This feature class contains all MEDS/MEDS+ as approved by NGA. Complete

field and attribute information is available in the "Entities and Attributes" metadata section. Geographical coverage is depicted in the thumbnail above and detailed in the Place Keyword section of the metadata. This release includes the addition of 3917 new records, modifications to the spatial location and/or attribution of 97,771 records, and removal of 4563 records not present in the NCES CCD data.

PURPOSE

This feature class/shapefile captures Public Schools defined by the Common Core Data (CCD) for the Homeland Infrastructure Foundation-Level Data (HIFLD) database. (<https://gii.dhs.gov/HIFLD>)

ATTRIBUTE ACCURACY

ATTRIBUTE ACCURACY REPORT

No formal attribute accuracy test was conducted. Data from the authoritative sources (as identified in other sections of this metadata) is assumed to be correct and accurate. See also "Overview Description" in the "Entities and Attributes" metadata section.

LOGICAL CONSISTENCY REPORT

Data were extracted from sources (identified in the SOURCE field) and other open source websites to populate the attribute fields. For string and date data types, NOT AVAILABLE values denote missing data that was not present in the source data. For numeric data types, -999 denotes missing data that was not present in the source data. For text fields sourced to NCES CCD, 'M' indicates that a value for that record is 'missing' (A value was expected and none was reported) and 'N' indicates that the data

is 'Not applicable'. For numeric fields sourced to NCES, -1 indicates missing, not available, or not reported data items and -2 indicates 'not applicable' data items. During quality control, attributes were checked to ensure that they fell within the expected ranges or had expected/valid values. Text attribute values were checked for spelling and usage consistency. No topology tests were conducted. All records were verified to occur within the spatial domain of the feature class/shapefile.

COMPLETENESS REPORT

Data is complete as of the most recent date indicated in the Time Period section.

POSITIONAL ACCURACY

HORIZONTAL POSITIONAL ACCURACY

HORIZONTAL POSITIONAL ACCURACY REPORT

None; all efforts are made to place the geographic representation of the facility on-entity using the best available imagery from a wide variety of sources. Users should read and understand the VAL_METHOD metadata as well as the Processing Steps.

VERTICAL POSITIONAL ACCURACY

VERTICAL POSITIONAL ACCURACY REPORT

None; dataset contains no vertical data.

SOURCE CONTRIBUTION

Source information used in support of the development of the data set.

PROCESS STEP

PROCESS DESCRIPTION

Authoritative data sources are identified through open source research. That data is then acquired and transformed into a usable data format. The properly formatted data then goes through preprocessing steps that includes a geocoding operation to give spatial context to the data. The data goes through further refinement using remote sensing techniques. After preprocessing, every record goes through a review process and each point is moved to a facility based on-entity location based on interpretation of the best available imagery and open source information. Public Schools that are part of a multi-building campus were located on a large building towards the center of campus. The VAL_DATE field indicates the date in which the review step took place.

DETAILED DESCRIPTION

ENTITY TYPE

ENTITY TYPE LABEL Public Schools

ENTITY TYPE DEFINITION

Attribute fields were populated using sources identified in the SOURCE field for the period covered in the Time Period metadata and other open source data. For string and date data types, NOT AVAILABLE values denote missing data that was not present in the source data. For numeric data types, -999 denote missing data that was not present in the source data. However, the missing data may be present in other sources not yet discovered and used in the creation and/or maintenance of this dataset. These records may be populated with valid information in future update cycles. For fields sourced to NCES CCD, 'M' indicates that a value for that record is 'missing' (A value was expected and none was reported) and 'N' indicates that the data is 'Not applicable'. For numeric fields sourced to NCES, -1 indicates missing, not available, or not reported data items and -2 indicates 'not applicable' data items.

ATTRIBUTE

ATTRIBUTE LABEL POPULATION

ATTRIBUTE DEFINITION

Sum of ENROLLMENT field and FT_TEACHER field. When ENROLLMENT or FT_TEACHER is represented by a -1, -2, or -999, POPULATION will be equal to the field (ENROLLMENT or FT_TEACHER) that contains a positive integer. A POPULATION value of -999 indicates that both ENROLLMENT and FT_TEACHER are represented by a -1, -2, or -999. Please refer to the ENROLLMENT and FT_TEACHER field for further information regarding values of -1, and -2.

ATTRIBUTE

ATTRIBUTE LABEL SHELTER_ID
ATTRIBUTE DEFINITION
National Shelter System ID. Features without an associated shelter will have a shelter ID of "Not Available".

ATTRIBUTE DEFINITION SOURCE Oak Ridge National Laboratory

OVERVIEW DESCRIPTION

ENTITY AND ATTRIBUTE OVERVIEW

The entity and attribute information provided here describes the tabular data associated with the data set. Please review the detailed descriptions that are provided (the individual attribute descriptions) for information on the values that appear as fields/table entries of the data set. Please see the "Processing Steps" section for further methodology. For string and date data types, NOT AVAILABLE values denote missing data that was not present in the source data. For numeric data types, -999 denotes missing data that was not present in the source data. However, the missing data may be present in other sources not yet discovered and used in the creation and/or maintenance of this dataset. These records may be populated with valid information in future update cycles. For fields sourced to NCES CCD, 'M' indicates that a value for that record is 'missing' (A value was expected and none was reported) and 'N' indicates that the data is 'Not applicable'. For numeric fields sourced to NCES, -1 indicates missing, not available, or not reported data items and -2 indicates 'not applicable' data items.
