Summary

The Facility Registry Service (FRS) provides quality facility data to support EPA's mission of protecting human health and the environment by identifying and geospatially locating facilities, sites, or places subject to environmental regulations of environmental interest. Facility data is improved with geospatial processing of incoming data and data curation tools to provide an integrated, dataset to partners and the public through a variety of methods and products. For more detailed information about these facilities, use the FRS Query tool. This layer provides location and facility information for sites found in the Assessment Cleanup and Redevelopment Exchange System (ACRES). ACRES stores information reported by EPA's Brownfields grant recipients on Brownfields properties assessed or cleaned up with grant funding, as well as information on Targeted Brownfields Assessments (TBA) performed by EPA Regions. Assessment Cleanup and Redevelopment Exchange System (ACRES) Facilities including brownfield properties. This EPA Geospatial data set is generated by the U.S. EPA FRS Support team from the following national environmental program: Assessment, Cleanup and Redevelopment Exchange System. The Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on Brownfields properties assessed or cleaned up with grant funding, as well as information on Targeted Brownfields Assessments (TBA) performed by EPA Regions. ** MARIS extracted the Mississippi sites on February 6, 2022.

Description

Brownfield Sites for the State of Mississippi - updated December, 2021

Credits

MS Department of Environmental Quality, EPA, MARIS

Use limitations

Unless otherwise specified, all data produced by the U.S. EPA is by default in the public domain and is not subject to domestic copyright protection under 17 U.S.C. § 105. More details on the U.S. Public Domain license are available here: <https://www.usa.gov/publicdomain/label/1.0/>

Additionally, please be advised that although these data have been processed successfully on a computer system at the U.S. EPA, no warranty expressed or implied is made regarding the accuracy or utility of the data on any other system or for general or scientific purposes, nor shall the act of distribution constitute any such warranty. It is also strongly recommended that careful attention be paid to the contents of the metadata file associated with these data to evaluate data set limitations, restrictions or intended use. The U.S. EPA shall not be held liable for improper or incorrect use of the data.

CONSTRAINTS

LIMITATIONS OF USE

Data records contained within are a materialized view based on the EPA geospatial tables which are refreshed based on the record's Last_Reported_Date field. The view is based on a join of the facility site table and the interest table to include the universe of interest types per program system id. Data records that do not contain positional information (latitude and longitude values) are not in this view. Imported data into file geodatabase as new feature classes. Created ISO-compliant metadata for each file geodatabase feature class. Created Esri ArcGIS Pro map document (APRX). Created ISO-compliant metadata for the data download package. Zipped data, map document, and metadata.
