Title: Veterans Health Administration Medical Facilities

Edition: 4th Quarter 2007

Geospatial Data Presentation Form: vector digital data

Online Linkage: [HSIP GOLD 2015](#)

Description:

Abstract: Veterans Health Administration Medical Facilities in the United States This dataset includes Veteran Affairs hospitals, Veteran Affairs residential rehabilitation treatment programs, Veteran Affairs Nursing Home Care Units (NHCUs), Veteran Affairs Outpatient Clinics, Vet Centers, and Veteran Affairs Medical Centers. It should not include planned and suspended (non-operational) sites and mobile clinics. These definitions were set by the Veterans Health Administration (VHA) Policy Board in December 1998 and are the basis for defining the category and the additional service types for each VHA service site. These definitions cover sites generally owned by the Department of Veterans Affairs (VA) with the exception of leased and contracted community-based outpatient clinics (CBOCs). 1. VA HOSPITAL: an institution (health care site) that is owned, staffed and operated by VA and whose primary function is to provide inpatient services. NOTE: Each geographically unique inpatient division of an integrated facility is counted as a separate hospital. 2. VA RESIDENTIAL REHABILITATION TREATMENT PROGRAM: provides comprehensive health and social services in a VA facility for eligible veterans who are ambulatory and do not require the level of care provided in nursing homes. 3. VA NURSING HOME CARE UNITS (NHCUs): provides care to individuals who are not in need of hospital care, but who require nursing care and related medical or psychosocial services in an institutional setting. VA NHCUs are facilities designed to care for patients who require a comprehensive care management system coordinated by an interdisciplinary team. Services provided include nursing, medical, rehabilitative, recreational, dietetic, psychosocial, pharmaceutical, radiological, laboratory, dental and spiritual. 4. VA OUTPATIENT CLINICS: a. Community-Based Outpatient Clinic: a VA -operated, VA -funded, or VA -reimbursed health care facility or site geographically distinct or separate from a parent medical facility. This term encompasses all types of VA outpatient clinics, except hospital-based, independent and mobile clinics. Satellite, community-based, and outreach clinics have been redefined as CBOCs. Technically, CBOCs fall into four Categories, which are: > (i) VA-owned. A CBOC that is owned and staffed by VA. > (ii) Leased. A CBOC where the space is leased (contracted), but is staffed by VA. NOTE: This includes donated space staffed by VA. > (iii) Contracted. A CBOC where the space and the staff are not VA. This is typically a Healthcare Management Organization (HMO)-type provided where multiple sites can be associated with a single station identifier. > (iv) Not Operational. A CBOC which has been approved by Congress, but has not yet begun operating. b. Hospital-Based Outpatient Clinic: outpatient clinic functions located at a hospital. c. Independent Outpatient Clinic: a full-time, self-contained, freestanding, ambulatory care clinic that has no management, program, or fiscal relationship to a VA medical facility. Primary and specialty health care services are provided in an outpatient setting. 5. VET CENTER: Provides professional readjustment counseling, community education, outreach to special populations, brokering of services with community agencies, and access to links between the veteran and VA. 6. VA MEDICAL CENTER: a medical center is a unique VA site of care providing two or more types of services that reside at a single physical site location. The services provided are the primary service as tracked in the VHA Site Tracking (VAST) (i.e., VA Hospital, Nursing Home, Domiciliary, independent outpatient clinic (IOC), hospital-based outpatient clinic (HBOC), and CBOC). The definition of VA medical center does not include the Vet Centers as an identifying service. This dataset is based upon GFI data received from the National Geospatial-Intelligence Agency (NGA). At the request of NGA, text fields in this dataset have been set to all upper case to facilitate consistent database engine search results. At the request of NGA, all diacritics (e.g., the German umlaut or the Spanish tilde) have been replaced with their closest equivalent English character to facilitate use with database systems that may not support diacritics. The currentness of this dataset is indicated by the [CONTDAT] attribute. Based upon this attribute, the oldest record dates from 09/21/2007 and the newest record dates from 10/15/2007.

Purpose: Homeland Security Use Cases: Use cases describe how the data may be used and help to define and clarify requirements. > 1) A disaster or health emergency has occurred, or is predicted, in an area and resources need to be summoned to respond to structures affected by the event. > 2) A threat to the veterans health system has been discovered, and emergency personnel must respond to that threat. > 3) A disaster has occurred, or is in the process of occurring, and facilities in the vicinity with people needing evacuation assistance must be identified.

Supplemental Information: If you are using this dataset as a shapefile, please be aware that it was converted from a Geodatabase. As a result, this shapefile may have attribution and metadata errors resulting from the conversion process. The following are known issues: null values may have been changed to 0s (zeros) or to blank values, numbers (including latitude and longitude) may have been rounded up or down, there may be issues with Unicode character strings, and time cannot be stored in a date field. Field names may have been truncated to no longer than 10 characters or completely changed, lengthy string attributes may have been truncated to 254 characters, and attribute columns may have been deleted. Shapefiles do not support coded domains and subtypes therefore the original file geodatabase attribution and metadata information for coded domains and subtypes could be incorrect or missing in the shapefile version. Please visit the following ESRI website for more information: <http://pro.arcgis.com/en/pro-app/tool-reference/appendices/geoprocessing-considerations-for-Shapefile-output.htm>

Detailed Description:

Entity Type:

Entity Type Label: Veterans Health Administration Medical Facilities

Entity Type Definition: 1. VA HOSPITAL: an institution (health care site) that is owned, staffed and operated by VA and whose primary function is to provide inpatient services. NOTE: Each geographically unique inpatient division of an integrated facility is counted as a separate hospital. 2. VA RESIDENTIAL REHABILITATION TREATMENT PROGRAM: provides comprehensive health and social services in a VA facility for eligible veterans who are ambulatory and do not require the level of care provided in nursing homes. 3. VA NURSING HOME CARE UNITS (NHCUs): provides care to individuals who are not in need of hospital care, but who require nursing care and related medical or psychosocial services in an institutional setting. VA NHCUs are facilities designed to care for patients who require a comprehensive care management system coordinated by an interdisciplinary team. Services provided include nursing, medical, rehabilitative, recreational, dietetic, psychosocial, pharmaceutical, radiological, laboratory, dental and spiritual. 4. VA OUTPATIENT CLINICS: a. Community-Based Outpatient Clinic: a VA -operated, VA -funded, or VA -reimbursed health care facility or site geographically distinct or separate from a parent medical facility. This term encompasses all types of VA outpatient clinics, except hospital-based, independent and mobile clinics. Satellite, community-based, and outreach clinics have been redefined as CBOCs. Technically, CBOCs fall into four Categories, which are: > (i) VA-owned. A CBOC that is owned and staffed by VA. > (ii) Leased. A CBOC where the space is leased (contracted), but is staffed by VA. NOTE: This includes donated space staffed by VA. > (iii) Contracted. A CBOC where the space and the staff are not VA. This is typically a Healthcare Management Organization (HMO)-type provided where multiple sites can be associated with a single station identifier. > (iv) Not Operational. A CBOC which has been approved by Congress, but has not yet begun operating. b. Hospital-Based Outpatient Clinic: outpatient clinic functions located at a hospital. c. Independent Outpatient Clinic: a full-time, self-contained, freestanding, ambulatory care clinic that has no management, program, or fiscal relationship to a VA medical facility. Primary and specialty health care services are provided in an outpatient setting. 5. VET CENTER: Provides professional readjustment counseling, community education, outreach to special populations, brokering of services with community agencies, and access to links between the veteran and VA. 6. VA MEDICAL CENTER: a medical center is a unique VA site of care providing two or more types of services that reside at a single physical site location. The services provided are the primary service as tracked in the VHA Site Tracking (VAST) (i.e., VA Hospital, Nursing

Home, Domiciliary, independent outpatient clinic (IOC), hospital-based outpatient clinic (HBOC), and CBOC). The definition of VA medical center does not include the Vet Centers as an identifying service.

Entity Type Definition Source: These definitions were set by the Veterans Health Administration (VHA) Policy Board in December 1998 and are the basis for defining the category and the additional service types for each VHA service site. These definitions cover sites generally owned by the Department of Veterans Affairs (VA) with the exception of leased and contracted community-based outpatient clinics (CBOCs).

Attribute:

Attribute Label: NAICSCODE

Attribute Definition: NAICS (North American Industry Classification System) Code for entity. NAICS codes (and NAICS Descriptions) have been assigned based upon the entity's primary function, regardless of if that is the function that qualified it to be included in this dataset. On the other hand, HSIP Themes are assigned based upon the function that qualified an entity for inclusion in this dataset. It is possible that if an entity appears in more than one dataset, it will have a different HSIP Theme in each dataset; however, it should have the same NAICS Code and NAICS Description in each case. NAICS codes were assigned based upon data received from the RMP, with the primary NAICS Code listed first.

Attribute Domain Values:

Codeset Domain:

Codeset Name: North American Industry Classification System (NAICS 2002)

Codeset Source: US Census Bureau - <http://www.census.gov/epcd/www/naics.html>

Attribute:

Attribute Label: PHONE

Attribute Definition: Seven (7) digit telephone number for entity formatted as nnn-nnnn. All alphabetic characters have been translated to the corresponding numeric digit.

Attribute Definition Source: TGS

Attribute Domain Values:

Unrepresentable Domain: Phone numbers formatted as nnn-nnnn. Only numeric digits are used. The first three (3) digits (the exchange) must form a valid combination with the area code. A list of valid area code and exchange combinations can be obtained from <http://www.nanpa.com>

Attribute:

Attribute Label: NGAID

Attribute Definition: Unique identifier for feature

Attribute Definition Source: TGS

Attribute Domain Values:

Unrepresentable Domain: Text

Attribute:

Attribute Label: NAME

Attribute Definition: Name of entity. TGS has attempted to replace abbreviations because they can be ambiguous. However, some abbreviations remain in this attribute. In the case of an agency with multiple locations, TGS has attempted to name the locations following the format <agency name> - <location name>. For example Yell County Sheriff - Danville Office; however, the formatting of the names remains inconsistent.

Attribute Definition Source: TGS

Attribute Domain Values:

Unrepresentable Domain: Text

Attribute:

Attribute Label: CITY

Attribute Definition: The name of the city associated with the entity's physical address. For physical addresses that the U.S. Postal Service (USPS) delivers to, this should be a "city" acceptable to the USPS as defined in their Address Information System (AIS). Sometimes the USPS does not deliver mail to a physical address, but recognizes the location (i.e., they list the location as "undeliverable"). The cities associated with these locations are acceptable. In some cases, the USPS does not recognize individual physical addresses in a city; rather, they list the city as having "General Delivery". In these cases, the city and associated zip code are acceptable (the entity's [ADDRESS] attribute will contain a street address, not "general delivery"). The entity may not actually be located within the city limits of the "city" specified in its city field. Instead, it may actually be located within the city limits of another city. In some cases, the "city" that appears in this attribute may not even be a city in an administrative sense, but it is still an acceptable "city" to the USPS. An example of this is "Notre Dame, IN". There is no city in Indiana called "Notre Dame", but this is considered an acceptable city by the USPS for any delivery going to the University of Notre Dame which is actually located in the city of South Bend. "Notre Dame", like most USPS cities, is an easily recognized place, and it gives the user of the data a good general idea of where the entity is located (if the entity is located in a small municipality, the USPS "city" may be more recognizable than the name of the municipality), and it would be part of the address one would use to send a shipment to the entity's location. Using the USPS acceptable "city" also allows someone to do a logical consistency check between the zip code and the city by using the USPS AIS. Sometimes an entity may report a city that is not accepted by the USPS, and although TGS has tried to replace those cities with an acceptable alternative, some of them may remain in this dataset.

Attribute Definition Source: TGS

Attribute Domain Values:

Unrepresentable Domain: Text

Attribute:

Attribute Label: OBJECTID

Attribute Definition: Internal feature number.

Attribute Definition Source: ESRI

Attribute Domain Values:

Unrepresentable Domain: Sequential unique whole numbers that are automatically generated.

Attribute:

Attribute Label: COUNTY

Attribute Definition: County name where entity is located.

Attribute Definition Source: TGS

Attribute Domain Values:

Codeset Domain:

Codeset Name: Geographic Names Information System (GNIS)

Codeset Source: US Department of the Interior - US Geologic Survey

Attribute:

Attribute Label: ADDRESS

Attribute Definition: Physical street address for entity. "PO Box", "General Delivery", "Rural Route", and "Highway Contract" addresses are not considered physical addresses and should not appear in this attribute. Some areas do not have regular city style addressing so entities in those areas may not have a street number. In such cases, the name of the road they are located on is listed in this attribute. Some rural areas may not have named roads. In these rare cases, this attribute will be blank.

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: 0

Enumerated Domain Value Definition: Indicates entity is not a VA Nursing Home.

Enumerated Domain Value Definition Source: VHA Planning Systems Support Group, field unit for the Office of the Assistant Deputy Under Secretary for Health for Policy and Planning

Enumerated Domain:

Enumerated Domain Value: 1

Enumerated Domain Value Definition: Indicates entity is a VA Nursing Home.

Enumerated Domain Value Definition Source: VHA Planning Systems Support Group, field unit for the Office of the Assistant Deputy Under Secretary for Health for Policy and Planning

Attribute:

Attribute Label: ST_VENDOR

Attribute Definition: Indicates name of vendor providing original street data used for geocoding.

Attribute Definition Source: TGS

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: TGS

Enumerated Domain Value Definition: TGS drew in a new street segment that does not exist in the file supplied by NAVTEQ.

Enumerated Domain Value Definition Source: TGS

Enumerated Domain:

Enumerated Domain Value: TIGER

Enumerated Domain Value Definition: Tiger streets were used for geocoding.

Enumerated Domain Value Definition Source: TGS

Enumerated Domain:

Enumerated Domain Value: AS_GOV

Enumerated Domain Value Definition: Streets provided by the territorial government of American Samoa were used for geocoding.

Enumerated Domain Value Definition Source: TGS

Enumerated Domain:

Enumerated Domain Value: NAVTEQ

Enumerated Domain Value Definition: NAVTEQ streets were used for geocoding.

Enumerated Domain Value Definition Source: TGS

Enumerated Domain:

Enumerated Domain Value: <BLANK>

Enumerated Domain Value Definition: Entity was geocoded using provided coordinates; therefore, the street vendor is unknown.

Enumerated Domain Value Definition Source: TGS

Attribute:

Attribute Label: FEATTYPE

Attribute Definition: Geometry type of feature.

Attribute Definition Source: TGS

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: POINT

Enumerated Domain Value Definition: Feature is represented by point.

Enumerated Domain Value Definition Source: TGS

Attribute:

Attribute Label: NAICSDESCR

Attribute Definition: NAICS (North American Industry Classification System) Description for entity. At the request of NGA, the "Index Entries" that appear on the NAICS webpage (<http://www.census.gov/epcd/www/naics.html>) are being used to populate this attribute as opposed to the "NAICS Title". While there is a one to one correspondence between NAICS Codes and "NAICS Titles", there is a one to many relationship between NAICS Codes and the "Index Entries". By using the "Index Entries", we have placed the entities that make up this layer into more specific categories; however, the user of this data should be aware that this was not the intended purpose of these "Index Entries". The "Index Entries" were intended as a way to search the NAICS database and as a way of enumerating ways in which establishments falling under the given NAICS Code may be named. Thus, there are often two or more "Index Entries" that are synonyms, for example: "Prisons" and "Penitentiaries". In cases like this, one of these synonyms was chosen and is now the standard "Index Entry" that TGS will use. If a specific "Index Entry" could not be determined for an entity, the NAICS title was used. For "Index Entries" truncated on the NAICS webpage (<http://www.census.gov/epcd/www/naics.html>), another website (<http://www.naics.com>) was referenced. NAICS descriptions (and NAICS codes) have been assigned based upon the entity's primary function, regardless of the function that qualified it to be

included in this dataset. On the other hand, HSIP Themes are assigned based upon the function that qualified an entity for inclusion in this dataset. It is possible that if an entity appears in more than one dataset, it will have a different HSIP Theme in each dataset; however, it should have the same NAICS Code and NAICS Description in each case.

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: OTHER OUTPATIENT CARE CENTERS

Enumerated Domain Value Definition: Other Outpatient Care Centers - [NAICS Code 62149]: This industry comprises establishments with medical staff primarily engaged in providing general or specialized outpatient care (except family planning centers and outpatient mental health and substance abuse centers).

Enumerated Domain Value Definition Source: North American Industry Classification System (NAICS 2002)

Enumerated Domain:

Enumerated Domain Value: REHABILITATION HOSPITALS (EXCEPT ALCOHOLISM, DRUG ADDICTION)

Enumerated Domain Value Definition: Rehabilitation Hospitals (except alcoholism, drug addiction) - [NAICS Code 622310]: This industry consists of establishments known and licensed as specialty hospitals primarily engaged in providing diagnostic and medical treatment to inpatients with a specific type of disease or medical condition (except psychiatric or substance abuse).

Enumerated Domain Value Definition Source: North American Industry Classification System (NAICS 2002)

Enumerated Domain:

Enumerated Domain Value: GENERAL MEDICAL AND SURGICAL HOSPITALS

Enumerated Domain Value Definition: General Medical and Surgical Hospitals - [NAICS Code 622110]: This industry comprises establishments known and licensed as general medical and surgical hospitals primarily engaged in providing diagnostic and medical treatment (both surgical and nonsurgical) to inpatients with any of a wide variety of medical conditions.

Enumerated Domain Value Definition Source: North American Industry Classification System (NAICS 2002)

Enumerated Domain:

Enumerated Domain Value: NURSING HOMES

Enumerated Domain Value Definition: Nursing homes - [NAICS Code 623110]: This industry comprises establishments primarily engaged in providing inpatient nursing and rehabilitative services.

Enumerated Domain Value Definition Source: North American Industry Classification System (NAICS 2002)

Attribute:

Attribute Label: GEOHOW

Attribute Definition: Method by which entity was geocoded.

Attribute Definition Source: TGS

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: AUTO

Enumerated Domain Value Definition: Entity was automatically geocoded.

Enumerated Domain Value Definition Source: TGS

Enumerated Domain:

Enumerated Domain Value: PROVIDED

Enumerated Domain Value Definition: The coordinates that were provided with the source data were not modified by TGS.

Enumerated Domain Value Definition Source: TGS

Enumerated Domain:

Enumerated Domain Value: MANUAL

Enumerated Domain Value Definition: Entity was manually geocoded.

Enumerated Domain Value Definition Source: TGS

Attribute:

Attribute Label: ZIP

Attribute Definition: Five (5) digit USPS zip code for entity's physical location.

Attribute Definition Source: TGS

Attribute Domain Values:

Codeset Domain:

Codeset Name: USPS Address Information System - Domain is further restricted by only allowing physical (non PO Box only) zip codes.

Attribute:

Attribute Label: X

Attribute Definition: Longitude in WGS 84 Decimal Degrees.

Attribute Definition Source: TGS

Attribute Domain Values:

Range Domain:

Range Domain Minimum: -180

Range Domain Maximum: 180

Attribute Units of Measure: WGS 84 Decimal Degrees

Attribute:

Attribute Label: GEOLINKID

Attribute Definition: Link ID for the street segment to which the entity was geocoded. Refer to the [ST_VENDOR] and [ST_VERSION] attributes for the street vendor and version that was used to geocode the entity.

Attribute Definition Source: TGS

Attribute Domain Values:

Unrepresentable Domain: Text

Attribute:

Attribute Label: STATE

Attribute Definition: Two (2) character abbreviation for state associated with the entity's physical address. In almost all cases, this is the same as the state where the entity has been depicted geospatially. However, there are cases, particularly where an entity is part of a larger facility that cuts across state lines, where the entity's location may be depicted in a state other than the one indicated in this attribute. Also, the state in which an entity appears to be located may change depending on the scale of the state boundary theme being used.

Attribute:

Attribute Label: EMERGPHONE

Attribute Definition: Ten (10) digit telephone number of emergency point of contact formatted as nnn-xxx-xxxx. All alphabetic characters have been translated to the corresponding numeric digit.

Attribute Definition Source: TGS

Attribute Domain Values:

Unrepresentable Domain: Phone numbers, including area code, formatted as nnn-xxx-xxxx. A list of valid area code and exchange combinations can be found at

Attribute:

Attribute Label: GEOPREC
Attribute Definition: Geospatial precision.
Attribute Definition Source: TGS
Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: BLOCKFACE
Enumerated Domain Value Definition: Entity is geocoded to correct block and correct side of street per street data indicated by [ST_VENDOR] and [ST_VERSION].
Enumerated Domain Value Definition Source: TGS

Enumerated Domain:

Enumerated Domain Value: ONENTITY
Enumerated Domain Value Definition: Entity is geocoded on entity rooftop per aerial imagery (in most cases USGS DOQQs).
Enumerated Domain Value Definition Source: TGS

Attribute:

Attribute Label: PHONELOC
Attribute Definition: Indicates whether the phone number in the phone field rings to the actual location of the entity.
Attribute Definition Source: TGS
Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: NO
Enumerated Domain Value Definition: Phone number does not ring to the actual entity location. It might ring to an administrative office or central location.
Enumerated Domain Value Definition Source: TGS

Enumerated Domain:

Enumerated Domain Value: <BLANK>
Enumerated Domain Value Definition: Unknown - It is not known if the entity's phone number rings to the entity's location.
Enumerated Domain Value Definition Source: TGS

Enumerated Domain:

Enumerated Domain Value: YES
Enumerated Domain Value Definition: Phone number rings to the actual entity location.
Enumerated Domain Value Definition Source: TGS

Attribute:

Attribute Label: ST_VERSION
Attribute Definition: Indicates the year and quarter of streets used for geocoding.
Attribute Definition Source: TGS
Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: 2006FE
Enumerated Domain Value Definition: 2006fe version of TIGER/Line streets was used for geocoding in areas where NAVTEQ does not have coverage.

Enumerated Domain Value Definition Source: TGS

Enumerated Domain:

Enumerated Domain Value: 2006Q4

Enumerated Domain Value Definition: 4th Quarter 2006 NAVTEQ street data was used for geocoding.

Enumerated Domain Value Definition Source: TGS

Enumerated Domain:

Enumerated Domain Value: 1990

Enumerated Domain Value Definition: 1990 version of American Samoa Government provided streets used for geocoding.

Enumerated Domain Value Definition Source: TGS

Enumerated Domain:

Enumerated Domain Value: <BLANK>

Enumerated Domain Value Definition: Entity was geocoded using provided coordinates; therefore, the street vendor is unknown.

Enumerated Domain Value Definition Source: TGS

Attribute:

Attribute Label: GEODATE

Attribute Definition: Date entity was geocoded by TGS.

Attribute Definition Source: TGS
