Type File Geodatabase Feature Class

Tags Digital Elevation Model, Topography, Altitude, Height, Contour, Elevation

Summary

The purpose of this project was to develop Mississippi statewide contour generation of 1 and 2 Feet from Digital Elevation Model (DEM).

Description

This metadata record describes the production of a Digital Elevation Model (DEM) and contours for the state of Mississippi. The DEM was compiled at a scale 4 feet resolution from LIDAR from a statewide project. LIDAR Data contribution from Mississippi Department Environmental Quality LIDAR acquisition occurred in T2016_Southwest Lidar. The following contributed to the Mississippi Statewide dataset: Mississippi Geographic Information, LLC, Mississippi Department Environmental Quality, NOAA Coastal Services Center, Mississippi DOT, Mississippi State University, and Mississippi Coordinating Council for Remote Sensing and GIS.
